

CALGAZ offers the convenience of an easily transported compact cylinder. Combined with the quality and consistency of our gas products, this makes **CALGAZ** a winning package

Focus On The Market – CALGAZ

Air Liquide's Cambridge, Md. facility is largely dedicated to the industrial hygiene gas business. We provide calibration standards and related equipment to customers around the world from this single location. This reflects our total commitment to the environmental and industrial hygiene markets. We focus on the markets we serve with extensive investment into research, development, manufacturing, and distribution.

CALGAZ customers benefit from our advances in technology and the global presence of the Air Liquide Group.

ISO 9002 Certification

As part of our commitment to excellence, our Cambridge facility is certified to ISO-9002. This is another example of the efforts Air Liquide makes to provide our **CALGAZ** customers with the highest quality gases, equipment, and customer service.

Why Non-Refillable Cylinders?

Convenience

Very little storage space required, totally portable, short lead times, full line of products.

Cost Effectiveness

No cylinder deposit, no rental fees, no return freight charges – cylinders are only filled once.

Light weight and small size reduces shipping costs.

Simplified Shipping

Our Cambridge facility can arrange airfreight service to any place in the world; **CALGAZ** takes care of all regulatory and documentation requirements.

High Quality

ISO 9002 Certified manufacturing, analytical accuracy, NIST weight traceable.
